Summary

Motivated Computer Science student with practical experience in full-stack development and graphic design. Skilled in building responsive web applications using HTML, CSS, JavaScript, and Ruby on Rails, alongside crafting engaging UI/UX designs and visual content. Quick to adapt to new technologies and collaborative environments, with a passion for combining functionality with creative design.

Experience

Graphic Designer – International Cricket Masters, UK – Dec 2024 – Feb 2025

- Created 50+ high-impact graphics, boosting online engagement by 30% across social media platforms.
- Delivered design assets for brochures, banners, and event campaigns used by 10K+ online followers.
- Researched and applied modern design trends to elevate brand consistency and visual storytelling.

Full Stack Developer Intern – TriCloud Technologies – Jun 2024 – Aug 2024

- Developed and optimized responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap 5, improving load speed by 25%.
- Assisted in backend development using Ruby on Rails, reducing server response times by 15%.
- Integrated multiple third-party APIs to expand core app functionality and streamline user experience.
- Participated in Agile sprints and peer code reviews, ensuring 100% adherence to clean code standards.

Leadership & Volunteering

Operations & Media Volunteer – ZACKS – Feb 2025 – Present

- Contributed to organizing tech and community events, handling design assets and digital media coverage.
- Supported team operations, documentation, and branding consistency across online platforms.

Projects

NobleAcres – Real Estate Web App

A full-featured real estate web application where users can sign up, create listings, and connect with landlords. **Stack:** React, Redux Toolkit, Firebase, JWT Authentication.

- Implemented secure JWT login and protected routes for listing management.
- Designed responsive UI for seamless cross-device experience.
- Integrated landlord–tenant messaging and state persistence using Redux.
- 🌐 Live App — 🌐 GitHub

ThinkBoard – MERN Note-Taking App

A full-stack CRUD application for managing notes, built to explore the MERN stack workflow from backend APIs to responsive UI. **Stack:** MongoDB, Express.js, React, Node.js.

- Implemented create, read, update, delete (CRUD) features with RESTful APIs.
- Used toast notifications for instant feedback and rate limiting for security.
- Deployed production-ready frontend served by backend for unified hosting.
- 🌐 Live App — 🌐 GitHub
